

Doctoral Students – current 2015 PhD

Abell S. Optimising risk prediction, antenatal interventions and treatment targets in gestational diabetes. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Abrahamson S. Sensory aspects of adult high-functioning autism spectrum disorders. Monash University. Anticipated completion: 2016. *Monash Alfred Psychiatry Research Centre.*

Abramovitch J. Influence of food processing on the allergic immune response to allergens of crustacean species. Monash University. Completed 2015. *Department of Immunology, Monash / Department of Allergy, Immunology and Respiratory Medicine, Alfred.*

Alam K. Burden of chronic disease and the socioeconomic determinants: evidence from Matlab, Bangladesh. Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash.*

Al-Hammad Y. The role of HCV variable regions in the infectivity of cell-culture derived HCV. Monash University. Completed 2015. *Burnet.*

Alrashadi SF. The contribution of inflammation to the development of retinal microvascular disease. Monash University. Anticipated completion: 2018. *Department of Immunology, Monash.*

Alrehailli A. Targeting the Nogo-A receptor (NgR1) signalling mechanism in a model of multiple sclerosis will limit the degeneration of axons. Monash University. *Department of Medicine, Monash.*

Al-Sharea A. The role of the parasympathetic nervous system in the bone marrow on the progression of atherosclerosis. Monash University. *Baker IDI.*

Alshehry Z. The relationship between dyslipidaemia and cardiovascular disease outcomes in diabetes. University of Melbourne. Anticipated completion: 2016. *Department of Cardiovascular Medicine, Alfred / Baker IDI.*

Ampt F. Reducing unintended pregnancies among female sex workers in Kenya using mHealth. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Anania J. Characterisation of a new Fc receptor for antibodies: implications for antibody therapeutics in cancer, immunity and infection. Monash University. Anticipated completion: 2017. *Department of Immunology, Monash / Burnet.*

Anders K. Individual and household risk factors for dengue and acute viral respiratory infections in Vietnamese infants. Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash.*

Anderson L. Cognitive and psychological factors present in Australian violent offenders. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Anderson R. The neurological mechanisms underlying the therapeutic effects of TMS for TRD. Monash University. Anticipated completion: 2016. *Monash Alfred Psychiatry Research Centre.*

Anderson R. Resilience, coping and quality of life surrounding vision loss and impairment in adolescence. Monash University. Anticipated completion: 2016. *Monash Alfred Psychiatry Research Centre.*

Angelovich T. Investigating the impact of chronic low level endotoxaemia on monocytes. RMIT University. Completed 2015. *Burnet.*

Anilovitch J. Cardiovascular responses to acute and chronic stress modulation by the renin-angiotensin-aldosterone system. Monash University. Anticipated completion: 2016. *Baker IDI.*

Ardipradja K. Activation-specific single-chain antibody constructs for positron emission tomography. University of Melbourne. Anticipated completion: 2016. *Baker IDI.*

Ariyaratne TV. Comparison of long-term outcomes and cost effectiveness of coronary artery bypassgraft surgery (CABG) and percutaneous coronary interventions (PCI). Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash / Clinical Pharmacology Unit, Alfred.*

Arnup S. Cluster randomised crossover trials in intensive care research. Monash University. Anticipated completion: 2022. *Department of Epidemiology and Preventive Medicine, Monash.*

Ashton S. Young women's experience with pornography: understanding the construction of sexual self-identity. Monash University. Anticipated completion: 2019. *Department of Epidemiology and Preventive Medicine, Monash.*

Baker K. Understanding and improving attention, thinking and memory difficulties experienced by people with chronic pain. Monash University. Anticipated complete: 2018. *Rehabilitation, Aged and Community Care, Alfred.*

Bakuraysah M. Targeting the molecular mechanisms of axonal degradation in multiple sclerosis. Monash University. Anticipated completion: 2017. *Department of Medicine, Monash.*

Barzel B. The role of neuromodulatory factors in the hypothalamus in the development of obesity related hypertension. Monash University. Completed 2015. *Baker IDI.*

Batras D. What are the determinants of organisational change to increase health equity through sport & recreation settings. Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash.*

Baye E. Reducing risk for diabetes. Monash University. Anticipated completion: 2019. *Department of Epidemiology and Preventive Medicine, Monash.*

Bell I. Use of ecological momentary assessment and intervention via smart phone for auditory hallucinations. Swinburne University. Anticipated completion: 2019. *Monash Alfred Psychiatry Research Centre.*

Bell S. The relationship between obesity and colorectal cancer. Monash University. Anticipated completion: 2018. *Centre for Obesity Research and Education / Department of Epidemiology and Preventive Medicine, Monash / Department of Surgery / Department of General Surgery, The Alfred.*

Bellomo R. The effect of intensity of continuous renal replacement therapy in critically ill patients. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Bennett A. Neutrophil extracellular traps. Monash University. *Australian Centre for Blood Diseases, Monash.*

Bergin KF. Clinical outcomes, prognostic indicators and mechanisms of relapsed/refractory multiple myeloma (MM). Monash University. Anticipated completion: 2018. *Australian Centre for Blood Diseases, Monash.*

Bhatt C. Investigation of health effects from mobile phones and other sources of radio-frequency radiation. Monash University. Anticipated completion: 2020. *Department of Epidemiology and Preventive Medicine, Monash.*

Bissessor M. Sexually transmitted infections in the rectum and HIV co-transmission in men who have sex with men. University of Melbourne. Completed 2015. *Melbourne Sexual Health Centre, Alfred.*

Black O. Differences in return to work between work-related mental health conditions and physical injuries. Monash University. Anticipated completion: 2022. *Department of Epidemiology and Preventive Medicine, Monash.*

Blake M. Building the evidence base for effective and equitable food and beverage pricing strategies. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Bobevski I. Demoralisation: a new concept in postnatal mental health. Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash.*

Boelsen-Robinson T. Understanding and informing food retailers to improve community-wide health food provision. Monash University. Anticipated completion: 2019. *Department of Epidemiology and Preventive Medicine, Monash.*

Bond M. Why diet and exercise alone won't solve the obesity epidemic. Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash.*

Brady S. Musculoskeletal conditions: novel risk factors, health care utilisation and management. Monash University. Anticipated completion: 2018. *Department of Rheumatology / Department of Epidemiology and Preventive Medicine, Monash.*

Brain M. Optimising efficiency and effectiveness of Continuous Renal Replacement Therapy (CRRT) in intensive care patients. Monash University. Anticipated completion: 2019. *Department of Epidemiology and Preventive Medicine, Monash.*

Brand R. Trauma-focused interventions for auditory verbal hallucinations. Swinburne University. Anticipated completion: 2018. *Monash Alfred Psychiatry Research Centre.*

Breare M. Participatory action research for health capability in a Swazi community caring for children affected by HIV and AIDS - a project ethnography. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Brilleman S. Joint longitudinal and time-to-event models for applications in health research. Monash University. Anticipated completion: 2021. *Department of Epidemiology and Preventive Medicine, Monash.*

Burge A. Physical activity in community dwelling people with COPD. La Trobe University. Anticipated completion: 2018. *Physiotherapy Department, Alfred.*

Burrell A. Right ventricular dysfunction in critically ill patients. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash / Department of Cardiovascular Medicine / Intensive Care Unit, Alfred.*

Burt AM. Characterisation of the novel influenza haemagglutinin microgube vaccine. Monash University. Anticipated completion: 2018. *Department of Immunology, Monash.*

Butterworth P. The association between obesity and foot pain. La Trobe University. Anticipated completion: 2016. *Department of Rheumatology, Monash.*

Cangkrama M. Analysis of the grainyhead-like genes in mammalian development and disease. Monash University. Completed 2015. *Department of Medicine, Monash.*

Cantwell K. Ambulance demand: random events or predictable patterns? Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash / Burnet.*

Cao T. Blood oxygenation changes resulting from transcranial magnetic stimulation of prefrontal cortex. Monash University. Anticipated completion: 2016. *Monash Alfred Psychiatry Research Centre.*

Carmody S. Determining health promotion programs sustainability across locations and populations. Monash University. Anticipated completion: 2019. *Department of Epidemiology and Preventive Medicine, Monash.*

Carruthers S. The muscarinic cholinergic system and cognition in schizophrenia. Swinburne University. Anticipated completion: 2018. *Monash Alfred Psychiatry Research Centre.*

Cartledge S. Targeting high-risk cardiac patients and their families for basic life support training. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Cashin K. Characterisation of viral tropism alterations during progressive HIV-1 subtype C infection. University of Melbourne. Completed 2015. *Burnet.*

Cavuoto M. Sleep and memory in older age and people with mild cognitive impairment. La Trobe University. Anticipated completion: 2016. *Rehabilitation, Aged and Community Care, Alfred.*

Chamberlain C. Assessing the efficacy of screening for gestational diabetes amongst Aboriginal women. Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash.*

Charnaud S. The mechanism of protein export in the blood stage of *Plasmodium falciparum*. Monash University. Completed 2015. *Department of Medicine, Monash / Burnet.*

Che XW. The role of social relations in the recovery of chronic pain after surgery. Monash University. Anticipated completion: 2018. *Monash Alfred Psychiatry Research Centre.*

Chen LF. Methicillin-resistant *Staphylococcus aureus* (MRSA) bloodstream infection: epidemiology, patient outcomes, risk factors, infection control methodology and prevention in community-based hospitals. Monash University. Anticipated completion: 2016. *Department of Medicine, Monash.*

Chenoweth A. Novel roles of Fc receptors in inflammation. Monash University. Anticipated completion: 2017. *Department of Immunology, Monash / Burnet.*

Childs W. The effects of chronic high-density lipoprotein (HDL) elevation with extended release niacin on peripheral arterial disease. Monash University. Anticipated completion: 2016. *Department of Cardiovascular Medicine, Alfred / Baker IDI / Department of Medicine, Monash.*

Chimmedamba O. Client behaviour when seeking preventative health services and attitudes of health care providers. Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash.*

Chin KL. Optimising management of heart failure with preserved ejection fraction. Monash University. Anticipated completion: 2018. *Clinical Pharmacology Unit, Alfred / Department of Epidemiology and Preventive Medicine, Monash.*

Chin KY. Investigation of the mechanism(s) of flavonol-induced cardioprotection. RMIT University Completed 2015. *Baker IDI.*

Chiu S. Defining the role of LYL1 and NF-kappaB in T cell acute lymphoblastic leukaemia. Monash University. *Australian Centre for Blood Diseases, Monash.*

Chou L. Epidemiology of diabetes complications in Australia. Monash University. Anticipated completion: 2017. *Department of Rheumatology / Department of Epidemiology and Preventive Medicine, Monash.*

Choy M. Stabilising unstable atheromas and preventing plaque rupture by inhibiting matrix metalloproteinases (MMP) activity using zinc chelators delivered by novel antibody-targeted nanoparticles. Anticipated completion: 2016. *Department of Medicine, Monash / Baker IDI.*

Christensen B. Studies in ulcerative colitis. Monash University. Anticipated completion: 2016. *Department of Gastroenterology, Alfred / Monash.*

Christopher M. Dyslipidaemia resulting from obesity or other high-risk states is a major contributor and predictor of the onset and progression of diabetes. Monash University. Completed 2015. *Department of Medicine, Monash / Baker IDI / Department of Cardiovascular Medicine, Alfred.*

Chung SW. Optimisation of theta burst stimulation on depression. Monash University. Anticipated completion: 2016. *Monash Alfred Psychiatry Research Centre.*

Coghlan B. Sever influenza: epidemiology, clinical aspects and public health responses. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash / Burnet.*

Colgan T. Combinatorial gene therapy as an intervention for Duchenne muscular dystrophy. University of Melbourne. Anticipated completion: 2017. *Baker IDI.*

Contreras N. Memory deficit and psychosis. Monash University. Anticipated completion: 2016. *Monash Alfred Psychiatry Research Centre.*

Conway AJ. Characterisation of red cell mutants identified in an ENU mutagenesis screen. Monash University. *Australian Centre for Blood Diseases.*

Corcoran S. Autonomic mechanisms of recurrent syncope. Monash University. Anticipated completion: 2016. *Department of Cardiovascular Medicine, Alfred / Baker IDI.*

Cornelisse VJ. Gonococcal transmission patterns in Australia. Monash University. Anticipated completion: 2018. *Melbourne Sexual Health Centre, Alfred / Monash.*

Costello B. Non-invasive assessment of central haemodynamics and cardiac performance. Monash University. *Department of Cardiovascular Medicine, Alfred / Department of Medicine, Monash.*

Coulson T. Mortality and morbidity in cardiac surgery - a pre-intra and postoperative risk prediction model. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash.*

Coutsouvelis J. Optimising the use of supportive therapies in cancer treatment. Monash University. Anticipated completion: 2019. *Pharmacy Department, Alfred.*

Coyle H. The relationship between functional connectivity and cognitive function after traumatic brain injury. Monash University. Anticipated completion: 2018. *Monash Alfred Psychiatry Research Centre.*

Doctoral Students

Cross R. Transition of patient safety at the ED-ward interface. Deakin University. Anticipated completion: 2018. *Emergency and Trauma Centre, Alfred.*

Daglas M. Investigating the long term effects of TBI on the immune and fibrinolytic system. Monash University. Anticipated completion: 2016. *Australian Centre for Blood Diseases, Monash.*

De Vries M. The role of Grainyhead-like transcription factors in craniofacial development. Monash University. Anticipated completion: 2018. *Department of Medicine, Monash.*

Dempsey P. Sedentary behaviour: dose response and implications toward cardio-metabolic risk and health outcomes. Monash University. Anticipated completion: 2018. *Department of Medicine, Monash / Baker IDI.*

Di Marco E. Interaction of angiotensin and NOX- derived ROS in diabetes-associated atherosclerosis. Monash University. Anticipated completion: 2016. *Department of Medicine, Monash / Baker IDI.*

Digsu K. Challenges of tuberculosis treatment in northwest Ethiopia. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash.*

Diplock G Alice Springs Hospital Readmission Prevention Project. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash / Baker IDI.*

Dowman L. Pulmonary rehabilitation in ILD. La Trobe University. Anticipated completion: 2016. *Physiotherapy Department, Alfred.*

Doyle J. Early treatment of Hepatitis C infection in Australia. Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash / Burnet / Infectious Diseases Unit, Alfred.*

Dragoljevic D. Mechanisms of accelerated atherogenesis in rheumatoid arthritis. Monash University. Anticipated completion: 2018. *Baker IDI.*

Draxler D. New approaches for traumatic brain injury. Monash University. *Australian Centre for Blood Diseases, Monash.*

Duffield G. The application of mainstream technology for persons with severe traumatic brain injury. La Trobe University. Anticipated completion: 2020. *Rehabilitation, Aged and Community Care, Alfred.*

Dugee O. Economic costs and implications of non-communicables in Mongolia. Monash University. Anticipated

completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash.*

Dunne A. Swinburne University. Anticipated completion: 2017. *Rehabilitation, Aged and Community Care, Alfred.*

Dwyer R. An evaluation of the management of frail, elderly patients in emergency departments. Monash University. Anticipated completion: 2021. *Department of Epidemiology and Preventive Medicine, Monash.*

Dyson K. Modelling strategies to improve outcomes from out-of-hospital cardiac arrest. Monash University. Anticipated completion: 2020. *Department of Epidemiology and Preventive Medicine, Monash.*

Eastwood K. Managing the impact of growing low-acuity demand on ambulance services. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Ekegren C. Implementation and evaluation of a club-based online injury surveillance system in community Australian football. Completed 2015. Monash University. *Department of Epidemiology and Preventive Medicine, Monash.*

Elsworth B. Characterisation of the *Plasmodium falciparum* translocon protein PTEX150. Monash University. Completed 2015. *Department of Immunology, Monash / Burnet.*

Eyres L. Can measures of activity, participation and environmental factors enhance occupational therapists' clinical reasoning for complex discharge planning for older adults during inpatient rehabilitation? La Trobe University. Anticipated completion: 2022. *Occupational Therapy Service / Rehabilitation, Aged and Community Care, Alfred.*

Fancke B. Dendritic cells: development, tolerance and immunity. A novel cross-species study. Monash University. Completed 2015. *Department of Immunology, Monash / Burnet.*

Fiddes P. An evaluation of the education philosophies of Sir William Osler. Monash University. *Department of Medicine, Monash.*

Filia S. Monitoring and improving the outcomes and quality of life of people with psychosis – a biopsychosocial approach. Monash University. Anticipated completion: 2016. *Monash Alfred Psychiatry Research Centre.*

Fineberg D. The epigenetic dysregulation of obesogenic hypothalamic genes by maternal diet. Monash University. *Department of Medicine, Monash / Baker IDI.*

Fini N. Physical activity and cardiovascular risk post stroke. La Trobe University. Anticipated completion: 2019. *Rehabilitation, Aged & Community Care / Physiotherapy Department, Alfred.*

Finlayson S. Annexin-A1 mimetics: A novel therapeutic approach for targeting the cardiac complications of diabetes. Monash University. Anticipated completion: 2018. *Baker IDI.*

Fleming S. Role of ZEB/NuRD Interactions in haematopoiesis and lymphoid malignancies. Monash University. *Australian Centre for Blood Diseases.*

Fleur A. Bikram yoga for the treatment of pain. Monash University. Anticipated completion: 2017. *Rehabilitation, Aged and Community Care, Alfred.*

Fooladi E. The effect of transdermal testosterone on sexual function among SSRI(s) drugs users. Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash.*

Forbes F. The new role of fathers: the culturally and linguistically diverse family experience. Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash.*

Francis L. Gambling's community contributions: identifying the true impact on social and other capital. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Franklin N. Exploring the impact of malnutrition in Indigenous Australians and the efficacy of malnutrition screening at Alice Springs Hospital. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash / Baker IDI.*

French S. Defining the function of the thrombin receptor, PAR4, on human platelets. Monash University. *Australian Centre for Blood Diseases, Monash.*

Frescos N. Pain in wound management. La Trobe University. Anticipated completion: 2016. *Rehabilitation, Aged & Community Care, Alfred.*

Fuller L. Rehabilitation after lung transplantation. La Trobe University. Anticipated completion: 2016. *Physiotherapy Department, Alfred.*

Gagliardi F. Synchrotron microbeam polymer gel dosimetry. RMIT University. Anticipated completion: 2020. *William Buckland Radiotherapy Centre, Alfred.*

Gantner D. Traumatic brain injury - translation of research into practice study. Monash University. Anticipated completion: 2020. *Department of Epidemiology and Preventive Medicine, Monash.*

Gao Q. Developing a therapeutic nano-vaccine against ovarian cancer. Monash University. Anticipated completion: 2016. *Department of Immunology, Monash.*

Gare J. Antiretroviral therapy in Papua New Guinea: biological and social factors contributing to treatment outcome in HIV infected individuals. Monash University. Anticipated completion: 2016. *Burnet.*

Gartoulla P. Women at midlife: health behaviours, well-being and work performances. Monash University. Anticipated completion: 2021. *Department of Epidemiology and Preventive Medicine, Monash.*

Gearon E. Epidemiology of inequalities in overweight and obesity in Australians. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash / Baker IDI.*

Giam B. Pathological role of endothelial dysfunction in the development of the cardiorenal syndrome. Monash University. Anticipated completion: 2018. *Baker IDI.*

Gibney K. Analysis of notifiable infectious diseases in Australia, 1991-2011. Monash University. Anticipated completion: 2020. *Department of Epidemiology and Preventive Medicine, Monash.*

Gibson-Helm M. Women's public health in vulnerable populations and high risk groups. Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash.*

Gilbert H. New model of support and advocacy for women with severe mental illness. Monash University. Anticipated completion: 2022. *Monash Alfred Psychiatry Research Centre.*

Glassford N. Epidemiology of fluid administration, accumulation and balance in the critically ill and relationship between intravenous fluid therapy and patient-centred outcomes. Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash.*

Gledhill K. Patients' discharge from hospital: determining criteria for discharge 'readiness'. Deakin University. Anticipated completion: 2018. *Occupational Therapy Service / Rehabilitation, Aged and Community Care, Alfred.*

Goldstein R. Gestational diabetes mellitus and obesity in pregnancy. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Goller J. What do we know about the diagnosis and management of pelvic inflammatory disease in Australia?
Doctoral Students

University of Melbourne. Anticipated completion: 2016.
Melbourne Sexual Health Centre, Alfred.

Gory I. A prospective study of the pathogenesis and management of minimal hepatic encephalopathy in chronic. Monash University. Anticipated completion: 2016. *Department of Gastroenterology, Alfred / Monash.*

Gottschalk T. Identifying and targeting signalling pathways in lupus using a clinically relevant model. Monash University. Anticipated completion: 2017. *Department of Immunology, Monash.*

Graco M. Towards better management of obstructive sleep apnoea in acute tetraplegia. University of Melbourne. Anticipated completion: 2017. *Australasian Cochrane Centre.*

Guinane J. Understanding the influence of patients and families in triggering responses to critical patient deterioration. Deakin University. Anticipated completion: 2017. *Nursing, Alfred.*

Guirguis A. Apoptosis and its regulation in myelodysplasia - using basic mouse models and human samples. Monash University. Completed 2015. *Australian Centre for Blood Diseases, Monash.*

Guy A. Assessing disordered proteins in *Plasmodium falciparum* and their importance in humoral immunity. Monash University. Anticipated completion: 2017. *Department of Immunology, Monash / Burnet.*

Gwini S. Health services utilisation and comorbidities among Australian Gulf War Veterans. Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash.*

Habersberger J Pro-inflammatory effects of monomeric C reactive protein in vascular endothelium. Monash University. Completed 2015. *Department of Medicine, Monash / Baker IDI / Department of Cardiovascular Medicine, Alfred.*

Hadgraft N. Understanding the determinants of adults sedentary behaviour. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash / Baker IDI.*

Haile B. Enhancing access and utility of assays for ART initiation and monitoring in HIV patients in RLS. Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash.*

Halemba MS. Targeting the survival pathways in acute myeloid leukaemia cells. Monash University. Anticipated completion: 2018. *Department of Immunology, Monash.*

Hall P. A neuroeconomics investigation into reward and punishment sensitivity and its relation to depression. Monash University. Anticipated completion: 2016. *Monash Alfred Psychiatry Research Centre.*

Hall S. Emotional and social outcome after brain injury. University of Melbourne. Anticipated completion: 2017. *Rehabilitation, Aged and Community Care, Alfred.*

Harding J. The epidemiology and diabetes, obesity, the metabolic syndrome and cancer in Australia. Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash / Baker IDI.*

Haregu T. Integration of health system responses to HIV/AIDS and non-communicable diseases in developing countries. Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash.*

Harris C. Sustainability in health care by allocating resources effectively (SHARE): investigation of evidence-based decision making systems for resource allocation in a health service network. Monash University. Anticipated completion: 2019. *Australasian Cochrane Centre / Department of Epidemiology and Preventive Medicine, Monash.*

Hayes K. The effect of extracorporeal membrane oxygenation (ECMO) support on physical function and quality of life in thoracic transplant patient. La Trobe University. Anticipated completion: 2022. *Physiotherapy Department, Alfred.*

Heywood S. The novel actions of HDL on cardiac metabolism and function. University of Melbourne. Completed 2015. *Baker IDI.*

Higgins A. An economic evaluation of resuscitation in sepsis. Monash University. Anticipated completion: 2016. *Intensive Care Unit, Alfred / Department of Epidemiology and Preventive Medicine, Monash.*

Hill A. Enhancing cognitive function/neuroplasticity using non-invasive brain stimulation. Monash University. Anticipated completion: 2017. *Monash Alfred Psychiatry Research Centre.*

Hill B. Psychometric evaluation of the brachial assessment tool for the assessment of activity following adult traumatic brachial plexus injury. Griffith University. Anticipated completion: 2016. *Rehabilitation, Aged and Community Care, Alfred.*

Hiller J. Exploring opportunities for physio-pharmacological interventions in the perioperative period. Monash University. Anticipated completion: 2018. *Department of Medicine, Monash.*

Hocking J. Evaluation of the mechanism/s of action of MEK inhibitors in multiple myeloma. Monash University. *Australian Centre for Blood Diseases, Monash.*

Hockings L. Acute cardiogenic shock in the intensive care unit. Monash University. Anticipated completion: 2019. *Intensive Care Unit, Alfred / Department of Epidemiology and Preventive Medicine, Monash*

Hopper I. Polypharmacy in the heart failure patient: are all the drug classes required? Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash.*

Hoque E. Evaluation of different techniques of prostate cancer registry system. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Horat E. The role of NFkappaB1 in lymphocyte homeostasis and autoimmunity. Monash University. Anticipated completion: 2016. *Department of Immunology, Monash / Burnet.*

Hosseini H. Anti-atherogenic B1a B cells protect atherosclerosis via secreted IgM and IL10. Monash University. Completed 2015. *Baker IDI.*

Htet S. Who benefits from hospital equity fund in Myanmar? Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash.*

Htun NM. Monomeric CRP as inflammatory mediator and therapeutic target in acute coronary syndrome. Monash University. Anticipated completion: 2016. *Department of Cardiovascular Medicine, Alfred / Baker IDI / Department of Medicine, Monash.*

Huang ALI. Role of HMGB1 in atherothrombosis. Monash University. Anticipated completion: 2018. *Baker IDI.*

Huq M. Risk prediction modelling on cardiac outcomes. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Hussain M. Socioeconomic status and coronary heart disease risk factor trends in Bangladesh. Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine / Department of Rheumatology, Monash.*

Huynh K. The role of plasmalogens in Alzheimer's disease. Monash University. Anticipated completion: 2018. *Baker IDI.*

Huynh P. The role of CDA1 in an experimental model of diabetes-associated renal fibrosis. Monash University. *Baker IDI*

Iacovou M. Possible role of poorly absorbed short chain carbohydrates (FODMAPs) in the genesis of infect colic. Monash University. Anticipated completion: 2016. *Department of Gastroenterology, Monash / Alfred.*

Islam R. Inequalities in access to maternal health care services: a study among indigenous people in Bangladesh. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash.*

Islam T. Tailored electronic clinical quality feedback for nurse managers in acute care settings to improve patient outcomes. Deakin University. Anticipated completion: 2017. *Nursing, Alfred.*

Ivory S. Epidemiological risk prediction tools; methods and applications. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Ivulich S. Management of immunosuppressant therapies in lung transplantation. Monash University. Anticipated completion: 2019. *Pharmacy Department, Alfred.*

Jadaan S. Distinguishable gen regulatory mechanisms in heart disease. University of Melbourne. Anticipated completion: 2017. *Baker IDI.*

James R. Advance care directives within the mental health setting. RMIT University. Anticipated completion: 2020. *Nursing, Alfred.*

Jayasimhan A. Probing the pathogenesis of type 1 diabetics by studying the role of MHC class 1 expression on pancreatic ductal lineage cells. Monash University. Anticipated completion: 2016. *Department of Immunology, Monash.*

Jennings N. A randomised controlled trial evaluating outcomes of an emergency nurse practitioner service. Queensland University of Technology. Completed 2015. *Nursing / Emergency and Trauma Centre , Alfred*

Joglekar A. Mechanisms of tolerance following genetic manipulation and transfer of bone marrow stem cells. Monash University. Completed 2015. *Department of Immunology, Monash.*

Joham A. Interventions in borderline personality disorder. Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash.*

Johnson M. Population health of extensive gambling opportunities: interventions to minimise medical consequences. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Jokanivic N. Polypharmacy in residential aged care facilities. Monash University. Anticipated completion: 2017. *Pharmacy Department, Alfred.*

Jones D. The Medical Emergency Team: patient characteristics and resource utilisation. Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash.*

Kalff A. Multiple myeloma - strategies to predict outcomes in the era of novel anti-myeloma therapies. Monash University. *Australian Centre for Blood Diseases, Monash.*

Kampan NC. The role of immune responses in preventing relapse in women with epithelial ovarian cancer. Monash University. Anticipated completion: 2017. *Department of Immunology, Monash.*

Kaplan Z. Determining the role of GPIb binding to thrombin specifically pertaining to its effect on fibrin generation and impact on leukocyte – platelet interactions. Monash University. Completed 2015. *Australian Centre for Blood Diseases, Monash.*

Karim N. Assessing cluster phenomena of chronic disease risk factors using epidemiological modelling. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash.*

Kaspi A. The identification of clinically relevant therapies for human disease via high throughput sequencing. Monash University. *Department of Medicine / Baker IDI.*

Katik I. Regulation of telomerase activity and telomere remodelling in lymphocytes. Monash University. Anticipated completion: 2015. *Department of Immunology, Monash.*

Kay V. Promoting equity, sustainability and health: a framework for local action. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash.*

Kellow N. Dietary interventions to reduce advanced glycation end products. Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash / Baker IDI.*

Kevat D. The effect of time of day and consecutive night shift on human error in the ICU environment. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash / National Trauma Research Institute.*

Khamisa N. The causal nature of existing relationships between work-related stressors, burnout, job satisfaction and general health of South African nurses. Monash University.

Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash.*

Underwood J. Effects of pulsatile vs non-pulsatile perfusion on vascular function during extracorporeal support. Monash University. *Baker IDI.*

Vakalopoulos C Autism, a proposal: cerebellar stimulation will improve core symptoms. Monash University. Anticipated completion: 2018. *Monash Alfred Psychiatry Research Centre.*

van der Merwe J. Effect of VentrAssist pump on the peripheral circulation and the response of the pump to exercise. Monash University. Completed 2015. *Department of Surgery, Monash / Department of Cardiothoracic Surgery, Alfred.*

van Gemert C. National sentinel surveillance of STIs in Australia: use of testing and positivity information to understand trends in chlamydia infection. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash / Burnet.*

Veronese V. Maximising HIV testing and counselling opportunities among men who have sex with men in Myanmar. Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash.*

Ververis K. Receptor-mediated imaging using nanoparticle. University of Melbourne. *Baker IDI.*

Villani M. Pre-hospital management of diabetic emergencies by Victorian paramedics. Monash University. Anticipated completion: 2019. *Department of Epidemiology and Preventive Medicine, Monash.*

Vincent F. Role of BAFF and the T-independent innate immune system in lupus pathogenesis. Monash University. Anticipated completion: 2016. *Department of Immunology, Monash.*

Wade A. Models of care for hepatitis C in the era of directly acting antivirals. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash / Burnet.*

Wan A. GHM management in Chinese patients. Monash University. Anticipated completion: 2019. *Department of Epidemiology and Preventive Medicine, Monash.*

Ward MG. Studies in the optimisation of biologic therapies and thiopurines in inflammatory bowel disease. Monash University. Anticipated completion: 2018. *Department of Gastroenterology, Monash.*

Wasiak J. The physical and psychosocial outcomes following burn injury: a 12-month follow-up study. Monash University. Completed 2015. *Burns Unit, Alfred / Department of Epidemiology and Preventive Medicine, Monash.*

Watterson J. Measuring the effectiveness of the in-hospital and new on-base PARTY programs (Prevent Alcohol and Risk Related Trauma in Youth) in naval trainees. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash / National Trauma Research Institute, Alfred.*

Whillas A. Role of sympathetic activity in rheumatoid arthritis. Monash University. Anticipated completion: 2018. *Baker IDI.*

Wilkinson A. Prevention of sexually transmitted infections (STIs) and blood borne viruses (BBVs). Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash / Burnet / Infectious Diseases Unit, Alfred.*

Wilson K. Enhancing the immune response to vaccines using nanoparticles. Monash University. Anticipated completion: 2017. *Department of Immunology, Monash.*

Wimmer B. Polypharmacy and medication regimen complexity. Monash University. Anticipated completion: 2016. *Pharmacy Department, Alfred.*

Windi Y. Health and well-being of waste pickers in Surabaya. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash / Burnet.*

Winter R. Examining drug-related morbidity and mortality among prisoners and ex-prisoners. Monash University. Anticipated completion: 2016. *Department of Epidemiology and Preventive Medicine, Monash / Burnet / Infectious Diseases Unit, Alfred.*

Doctoral Students

Wong E. Modelling risk of comorbidities of cardiovascular disease, diabetes and chronic kidney disease using Markov chain. Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash / Baker IDI*

Woodford K. Feasibility of stereotactic ablative radiotherapy for locally advanced non-small-cell lung carcinoma. Monash University. Anticipated completion: 2022. *William Buckland Radiotherapy Centre, Alfred / Department of Surgery, Monash.*

Worsley R. Menopause and mental health at midlife. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash / Monash Alfred Psychiatry Research Centre.*

Wright B. Follow up of psychological health, mortality and cancer incidence in Gulf War Veterans. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash.*

Wright C. Developing an evidence base for using new technologies in health promotion. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash / Burnet.*

Wright T. Developing a model of care for survivorship in haematopoietic stem cell recipients in Victoria. Monash University. *Australian Centre for Blood Diseases, Monash.*

Yan BPY. Drug-eluting stent utilisation and impact in contemporary Australian interventional cardiology practice: insight from the Melbourne Interventional Group Registry. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash.*

Yao CK. Understanding the role of protein fermentation in regulating large bowel fermentation and therapeutic implications for gastrointestinal conditions. Monash University. Anticipated completion: 2016. *Department of Gastroenterology, Monash / Alfred.*

Ying YL. Identification and characterization of unstable atherosclerosis plaque associated microRNA. Monash University. Anticipated completion: 2018. *Baker IDI.*

Yip G. Integrated health care for the elderly: the imperative for system reform. Monash University. Anticipated completion: 2021. *Department of Epidemiology and Preventive Medicine, Monash.*

Yong M. Cytomegalovirus infection post transplantation. Monash University. Anticipated completion: 2016. *Infectious Diseases Unit, Alfred / Department of Medicine, Monash.*

Young K. Understanding women's experiences of endometriosis and condition-specific health care. Monash

University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Young K. Pain in multiple sclerosis. University of Melbourne. Anticipated completion: 2016. *Rehabilitation, Aged & Community Care, Alfred.*

Zaldivia K. Investigations into the effects of renal denervation on monocyte activation in hypertension. Monash University. *Baker IDI.*

Zelege B. Determining the consequences of persistent oestrogen deficiency in older Australian women. Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash.*

Zhu TP. Succinate receptor, GPR91, mediates activation of the renin-angiotensin system in retinal diseases. Monash University. Anticipated completion: 2016. *Department of Immunology, Monash.*

Zimbudzi E. Medication adherence in adult haemodialysis patients. Monash University. Anticipated completion: 2018. *Department of Epidemiology and Preventive Medicine, Monash.*

Other Doctorates

Bryce S. Comparing the effectiveness of domain and neuroplasticity-based approaches to cognitive remediation in patients with schizophrenia. Doctor of Psychology, Monash University. Anticipated completion: 2017. *Monash Alfred Psychiatry Research Centre.*

Cowie G. Public health policy and its behavioural outcomes - the evidence. Doctor of Public Health, Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash.*

Emonson M. Investigating the potential for brain stimulation to treat mild cognitive impairment. Doctor of Psychology, Monash University. Anticipated completion: 2017. *Monash Alfred Psychiatry Research Centre.*

Fitzgerald M. Computer-aided decision support for trauma reception and resuscitation. Doctor of Medicine, Monash University. Completed 2015. *Department of Surgery, Monash / Emergency and Trauma Centre, Alfred.*

Friedman A. Use of allopurinol in azathioprine/6-MP non-responders to optimise 6-TGN and improve outcomes. Doctor of Medicine, Monash University. Anticipated completion: 2016. *Department of Medicine, Monash / Department of Gastroenterology, Alfred.*

Green A. Investigating the effects of adjunct glycine therapy on cognitive function in schizophrenia. Doctor of Psychology, *Doctoral Students*

Monash University. Anticipated completion: 2016. *Monash Alfred Psychiatry Research Centre.*

Komadina N. Understanding the likely population impact of new and improved influenza vaccines. Doctor of Public Health, Monash University. Anticipated completion: 2017. *Department of Epidemiology and Preventive Medicine, Monash.*

Leet A. Myocardial fibrosis and function after heart transplantation. Doctor of Medicine, Monash University. Anticipated completion: 2016. *Department of Medicine, Monash / Department of Cardiovascular Medicine, Alfred.*

Louise S. The impact of a mindfulness-based intervention for auditory hallucinations on localised brain activity, attention and perceived symptoms with schizophrenia patients. Doctor of Psychology, Swinburne University. Anticipated completion: 2017. *Monash Alfred Psychiatry Research Centre.*

Meates K. Bridging the gap between sensory and social impairments in autism. Doctor of Psychology, Monash University. Anticipated completion: 2016. *Monash Alfred Psychiatry Research Centre.*

Merriman E. Defining optimal treatment for distal (calf) vein thrombosis. Doctor of Medicine, Monash University. Anticipated completion: 2019. *Department of Medicine, Monash.*

Reser M. Investigating factors that influence the efficacy of cognitive remediation therapy in people with schizophrenia. Doctor of Psychology, Swinburne University. Anticipated completion: 2018. *Monash Alfred Psychiatry Research Centre.*

Rintoul A. Observations of corporate and political interests in public health: improving health equity in the context of drugs, gambling and refugee health. Doctor of Public Health, Monash University. Completed 2015. *Department of Epidemiology and Preventive Medicine, Monash.*

Roberts K. Factors influencing participation in the workforce: perspectives of people with upper limb amputations and limb deficiencies. Doctor of Clinical Science - Occupational Therapy, La Trobe University. Anticipated completion: 2017. *Rehabilitation, Aged & Community Care / Occupational Therapy, Alfred.*

Roussy V. Planning and evaluation of services in the Victorian community health sector. Doctor of Public Health, Monash University. Anticipated completion: 2020. *Department of Epidemiology and Preventive Medicine, Monash.*

Ruben J. Intensity modulated radiotherapy: effect on dose distribution and scattered dose and implications for carcinogenesis. Doctor of Medicine, Monash University. Completed 2015. *William Buckland Radiotherapy Centre, Alfred.*

Scott M. Self, attachment and trauma in relation to voices.
Doctor of Psychology, Swinburne University. Anticipated
completion: 2018. *Monash Alfred Psychiatry Research Centre.*

Talbot B. Infectious disease risk-reducing awareness and
behavioural change programs for international students.
Doctor of Public Health, Monash University. Anticipated
completion: 2018. *Department of Epidemiology and Preventive
Medicine, Monash.*
